**Re: Public Records Act Request regarding copies of each and every written record, provided to the California Public Utilities Commission (CPUC) by Pacific Gas and Electric Company (PG&E), regarding any inspection of the transmission tower in Pulga, CA, which PG&E has identified as having an equipment failure at the time of the Camp Fire.
CPUC Reference No.: PRA #19-73**

Dear Mr. Campora:

On February 11, 2019, you asked the California Public Utilities Commission to provide you a copy of the following:

“Each and every written record, provided to the CPUC by Pacific Gas and Electric Company, regarding any inspection of the transmission tower in Pulga, CA, which Pacific Gas and Electric Company has identified as having an equipment failure at the time of the Camp Fire.”

All inspection records maintained by the Commission that would have covered the tower in question have already been made accessible to you. Please see my response to PRA #18-637. This response closes this request.

Please refer to **PRA #19-73** in your communications with the Commission regarding the above-referenced matter.

Very truly yours,

/s/ GARRETT TOY
